English

This week in English, the children designed their own Wild Thing character with inspiration taken from the story, 'Where the Wild Things Are'. The children explored the different features of the Wild Things and decided which characteristics their own wild thing will have. We are now creating an information leaflet on how to take care of a wild thing, including information on what it eats, where it sleeps and what it likes to do.

Maths

This week in Maths, the children have been looking at part-part-whole models and partitioning. We have focussed on understanding what a whole is, how you can split a whole into parts and that the parts combine to make the whole. We also learnt that a whole can represent a group of objects and have identified the missing parts of a whole.

History

The children continued exploring the topic of homes through the ages. The focus of this week's lesson was to investigate how homes have changed within living memory in the UK. Using photographs, the children compared houses from the 1900s with modern homes.

Physical Education

In PE this week, the children continued to work on their icicle dance and also explored the actions/movements of polar explorers. They then turned these actions into a dance. The lesson focused on performing controlled movements in time with the music.

Science

The children have been distinguishing between an object and the material that it's made from. The children were given a mystery bag. They were asked to feel and describe each item, without looking inside the bag.

Weekly Learning Letter

Home learning ideas:

For home learning, you could…

Label the monster. Think about the characteristics you gave your wild thing.

Complete the part-part-whole models.

Have a go at creating your own part-part-whole model.

What is the whole?

What are the parts?
