

Yr3 Learning Letter - Friday 24th March 2017

Martha & Lisa's class

Lions and tigers and bears! On Wednesday the whole of Year 3 went to the [Natural History Museum](#) as part of our science learning about humans and other animals. The children really did us proud and we had an excellent day. It was fantastic to be able to see so many animals up close, and to enjoy the many informative and interactive exhibits at the museum. Not only were we able to find out lots more about our current topic, but we also revisited our learning from last term about [Mary Anning](#), when we had a close look at some of the fossils she discovered. Thank you again to the parents who were able to help us on this trip.

Maths

Learning about time has continued in maths this week, and the complexity of accurately telling the time has been an enjoyable challenge for us all! The children have mastered lots of the vocabulary and are now practising all of the different aspects of reading and understanding time. They fully understand how important a skill this is, and we would all really appreciate any additional 'telling the time' work you can do at home.

In addition to learning about time, the children have been applying their number knowledge to solving fraction problems. This is one of the problems they tackled - please ask them to explain them to you!

These shapes are divided into eight equal parts. Do you agree? Explain your thinking.
