

Yr3 Learning Letter - Friday 2nd February 2018

Martha & Lisa's Class

This week we have been building on our times table knowledge and even started to learn the eight times table by making a clear connection with the 2s and the 4s. Alongside learning the tables and chanting the multiples along to some fun tunes on Youtube, the children have been solving problems by applying their multiplication knowledge.

The children have all been taking part in group reading/comprehension sessions with either Martha or Lisa and are all enjoying their new texts. Follow up questions have allowed them to show off their excellent understanding of what they have read.

Lots more history learning has happened this week. We have looked in even more detail at the way London has changed since the 18th century and the children have been able to draw clear comparisons between the different time periods. Everyone was shocked to learn about the blood sports that kept 18th century Londoners entertained. If you want to know more about this, ask your child! This then became geography learning as we looked at how London grew and plotted this on our own maps.

An example of a map of London in the 18th century

On Wednesday, we had a visit from Kareem who works for Lewisham Homes. He explained how the council goes about planning new homes for the needs of all the people in Lewisham. The children asked Kareem lots of interesting questions. This will help them to design their Forest Hill of the future which will be the culmination of all of our history and geography learning this term.

Please remember that Parents' Evenings are taking place next week.

Please check your emails for details of the two upcoming trips after half term. These are an Animal Classification Science trip to the Horniman on February 22nd and a music trip to the Barbican on 27th February.
