

Year One Home Learning Spring 2 - Week 3 - 13.3.20

This week we have been:

- * Enjoying British Science Week! We all explored ways to make different shapes/sizes and colours of bubbles; thought about diversity by making paper chain people and were engineers creating strong and sturdy Lego bridges for a giraffe to cross!
- * Writing a diary in role as Traction Man.
- * Sorting toys from now and the past.
- * Learning to use vocabulary related to length and height.
- * Measuring objects around the classroom and outdoor area.

For home learning, you can.....

- * Draw around your family members feet and find objects to measure them with.
- * Find 5 toys/teddies and put them in order from tallest to shortest.
- * Practise reading real and alien words at home by playing 'Picnic on Pluto' on your computer at home: <https://www.phonicsplay.co.uk/ChildrensMenu.htm>

Please bring in any egg boxes for a junk modelling project we are working on next week!

Phonics

In Sophie's group we have been investigating ways to spell /oa/ (coat, stone, toe, window, though) and finding out which ones are most common - or a 'best bet'. We have also been learning to read tricky words: water, where, who, again, thought, through, work, mouse

In Sarah's group we have been learning the alternative spellings for /oi/ (annoy, spoil) and when the different spelling rules apply. We have also been revising all of the phase 5 graphemes and blending them in words.

In Stephanie's group we have been revising different ways to spell the long vowels /ai/ (day, make, straight) and /ee/ (week, beach, happy, he). We have also been practising the tricky words: oh, their, I'm and people.

In Leela's group we have been learning the alternative pronunciation of the i grapheme (pin, behind), the o grapheme (hot, don't) and the c grapheme (clock, acid). We have also been revising all the tricky words, placing them into sentences.

In Rez's group we have been learning the split digraph o_e (lobe, stone, bone) and a_e (make, game, cake). we also wrote short sentences using all our previous digraphs including tricky words.

Have a great weekend!
