# Year Two Home Learning
Summer 2, Week 4 – 30.06.23

This week …

- We have been revisiting different topics in maths, using reasoning and problem-solving skills to answer questions.

28p   43p   41p   ?

The total cost of an apple and a pineapple is the same as the total cost of an orange and a banana.

How much does a banana cost?

$3 + \underline{} + 7 = 19$

$\underline{} + 4 + 6 = 11$

$2 + 6 + \underline{} = 16$

$1 + \underline{} + 3 = 13$

- In English, we been creating packaging for our DT products. We thought about the appearance and function to make it suitable. Then we made sure that the packaging was eye-catching so that it would attract people.

	What packaging would you design for this banana?
	How would you make it eye-catching?
	What are the key messages that should be included?
	How could you persuade the consumer to buy it?

- We have continued with our RE topic of Hinduism and learnt about the wedding traditions. The bride has mehndi patterns painted on her hands in henna. Mehndi is a form of temporary body art painted onto the skin using henna - a paste made of powdered, dry leaves from the henna plant.

Dates for your diary
It's another busy week!
Tuesday, 4th July – Kew Gardens
Thursday, 6th July – Parent drop in and *The Great Kilmorie Design Challenge*

We hope that you all have a relaxing weekend.
